THE MOST RECOGNIZED NAME IN SECURITY MANAGEMENT PRODUCTS

Simply the industry's best – THE POWERCHECK GUARD TOUR SYSTEM

Morse Watchman, the most recognized name in security management products and the innovators of the original The Boss®, brings to you PowerCheck, an easy to use, durable, computerized guard tour system. It is designed to prevent costly losses such as vandalism, theft, corporate espionage and damaging accidents throughout your facility. This system allows you to make sure your officers are making the rounds and will provide you with back-up documentation. PowerCheck gives you the most functional and effortless guard tour system your money can buy. Best of all, Morse Watchman offers you industry-leading warranties and exclusive lifetime support for the PowerCheck Guard Tour System.

PowerCheck®

An all-in-one unit – HAND-HELD DATA RECORDER

PowerCheck's hand-held data recorder enables your officers to input incidents encountered during their guard tours. The data recorder is engineered to be lightweight and sleek in design, making the unit easy for your officers to carry and handle. It's simple to use, completely self-contained, and extremely durable.

Know what's happening now – INCIDENT CODES

As your officers make their rounds, they will have the ability to enter in a user-programmable incident code on the hand-held data recorder's keypad. This cuts out any unnecessary paperwork for you and your officers.

Keep your officers on guard – AUTO PILOT: SEQUENTIAL AND RANDOM TOURS

One of the most powerful features is its unique Auto Pilot – the data recorder's display screen prompts your officers to visit the next station on the tour – eliminating the memorization of the checkpoints to visit in a tour. To prevent outsiders from predicting your officers' routes, use the Random Tour command, which initiates a completely new tour sequence every time the officer starts.

Made rough and tough – RUGGED CONSTRUCTION

PowerCheck's shock- and water-resistant data recorder has a resilient outer shell made from Lexan®, the same material used to make professional football helmets. It will function in temperatures ranging from -20° F to 140° F. The data recorder has a rechargeable battery and comes complete with a recharging base unit.

An unlimited commitment – ASSURED UPTIME

Should your data recorder be lost, stolen, or in need of repair, Morse Watchman will immediately send you a temporary replacement upon request. This free loaner is assured to you for the life of your PowerCheck. Our expert technicians will repair damaged units and have it returned to you within 48 hours of receipt. Our goal is to make sure your data recorders are always up and running.

Guaranteed for life – CHECKPOINT STATIONS

Everything you ever worried about before with other guard tour systems is absolutely accounted for with PowerCheck.

Stands up to man and nature – DURABLE CONSTRUCTION

Like the data recorders, the checkpoint stations boast an extremely durable construction. Unlike other “button” systems, these will withstand rough usage. And they won’t fade in the sun or fail in the rain like those “barcode” systems. Even if its surface has been vandalized, the stations will still be able to function.

Actual size

Works well anywhere – SMART DESIGN

The checkpoint stations’ compact size and design make them aesthetically pleasing and non-intrusive. Feel free to mount them anywhere throughout your facility, using the provided tamper-resistant screws and tool. And if you want like the checkpoint stations’ natural off-white color to match your interior décor, go ahead and paint them – they’ll still work!

Reporting for duty – EZ DATA SORTING SOFTWARE

Morse Watchman is the only company in the industry that designs, manufactures and supports their own guard tour software. This ensures the total quality control and compatibility of the systems. EZ Data Sorting Software is an exclusive Windows® application that offers extended functionality for PowerCheck. The multifunctional EZ software allows you to download tour information, program the data recorder, generate custom reports and manage files using one simple program.

Simply pick and click – QUICK ACCESS WINDOW

EZ’s Quick Access Window contains the four essential functions of the program. All you have to do is click the icon for the corresponding function you wish to perform.

Customize your information – TOUR REPORTS: EXCEPTION, INCIDENT & SUMMARY

EZ converts stored data from your officers’ tours into useful, detailed, printable reports. By choosing a fixed or variable set of criteria, you may customize the reports by time, day, week and month. You have the option of printing the tour information, including missed checkpoint stations, with an Exception Report. An Incident Report indicates what an officer came across on his tour. A Summary Report displays an overview of the tour information based on particular sequences. User-friendly EZ software lets you customize your officers’ tour information.

The one choice for every industry – PERFECT FOR YOUR FACILITY

If you’re utilizing mobile security, the PowerCheck Guard Tour System is an essential security measure. It’s perfect for every facility in every market, especially:

- Casino and Gaming Industries
 - Correctional Facilities
 - Healthcare Facilities
 - Hospitality Industries
 - Contract Security Companies
 - Multifamily Buildings
