

TOUR-PRO™

GUARD TOUR SOFTWARE

New User Friendly, Graphical-Interface Application Makes Data Sorting Easy for PowerCheck® and The Boss® Guard Tour Systems

Morse Watchmans, the Most Recognized Name in Security Management Products, introduces the Tour-Pro Guard Tour Software that offers extended functionality for The Boss and PowerCheck Guard Tour Systems. This unique software allows you to download tour information, program the data recorder, generate custom reports and manage files using one simple program. It converts stored data from your officers' tours into useful, detailed, printable reports. By choosing a fixed or variable set of criteria, you may customize the reports by time, day, week and month.

BUILT-IN SCHEDULER

The built-in scheduler will automatically download all reports to centralized or remote PCs. The system manager has the ability to choose how often to download the data recorders at specific or at all locations. The scheduler will then seek out the data recorder(s) and merge all new reports into the database.

MAXIMIZED NETWORK CAPABILITIES

Centralized programming allows for one or more PCs to administer multiple Guard Tour Systems at different locations using either the same or different programming. The software's database may be installed on a shared network drive, enabling reports to be generated from remote computers.

IMPROVED DATA RECORDER COMMUNICATIONS

Tour-Pro is engineered to operate over direct, modem, LAN (Local Area Network) and Internet connections. Upgraded access to the data recorders on a LAN allows system managers to perform functions on any data recorder using TCP/IP.

EXTENSIVE GUARD TOUR REPORTING

System managers will appreciate being able to administer more specifically detailed Guard Tour reports with less time and effort than ever before. One-step download quickly generates time-specific reports, which allow system managers to know exactly when incidents occur. Customizable reports include comprehensive incident and checkpoint information. System managers may elect to view a specific or summary tour report on-screen, then save and print the information.

Tour-Pro Guard Tour Software is compatible with both Morse Watchmans Guard Tour Systems:

PowerCheck®
Total Asset Protection
in the Palm of Your Hand

THE BOSS® Low-cost, Trusted
Security Supervision
